

BLUEPRINT FOR COMPLEX CARE

11 OPPORTUNITIES TO STRENGTHEN THE FIELD

The United States spends more on healthcare than any other industrialized nation, and much of that spending is concentrated on a small percentage of individuals with complex medical, behavioral, and social needs. The *Blueprint for Complex Care* aims to drive a collective strategy for advancing the field of care that serves this population.

Based on input from stakeholders across the country, the following are opportunities for strengthening the field:

1  **Develop core competencies** and standardized educational programs and resources to support their use.

What is Complex Care? Complex care is person-centered approach to addressing the needs of a relatively small, heterogeneous group of people who repeatedly cycle through multiple healthcare, social service, and other systems, yet do not derive lasting benefit from those interactions.

2  **Further develop quality measures for complex care** to accelerate learning and quality improvement and demonstrate value.

7  **Strengthen local cross-sector partnerships** to ensure the field is addressing social determinants and health equity effectively.

3  **Enhance and promote integrated, cross-sector data infrastructures** to build the field's knowledge and its ability to serve this population.

8  **Promote expanded public investment in innovation, research, and service delivery** through coalition building and federal advocacy.

4  **Identify research and evaluation priorities** to better understand subpopulations, implement strategies, and design new payment systems.

9  **Leverage alternative payment models that promote flexible and sustainable funding and create incentives** to address social needs.

5  **Engage allied organizations and champions through strategic communication and partnership** to align values, principles, and tactics.

10  **Create a field coordination structure that facilitates collective action and systems-level change** to create accountability to the field.

6  **Value the leadership of people with lived experience** to address the systemic issues impacting this population.

11  **Foster peer-to-peer connections and learning dissemination** to connect stakeholders to one another and facilitate discussion and shared learning.
